

AV Hounslow Garage

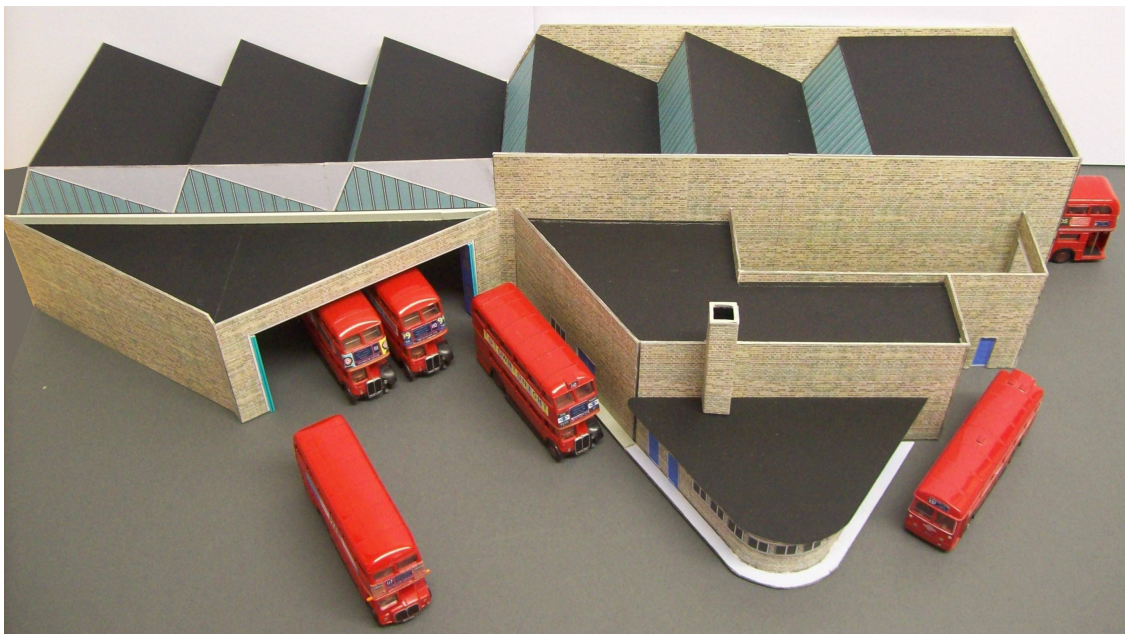

The original Hounslow garage had been built on the site of an old railway station.

After the war this was rebuilt, being completed in 1954 in London Transport's classic architectural style.

The model depicts the entrance and exit roads and has a relatively large covered area. It measures approximately 26" x 15".

The site also contained a bus station which for some years was covered (not included) which could be modelled, producing a scene of great interest.

Price: £18 including postage to UK.
