

## SBS Sevenoaks bus station

The bus station building at Sevenoaks was an unmistakable example of LT architecture. It provided waiting room accommodation for passengers, an office and canteen for staff, and toilets. The real building was situated at the rear of a parade of shops but the kit has a plain rear wall that can be used. Alternatively if you are happy with a half relief building then the matching brickwork might be used around the bus station. The building comes on a paved base measuring approximately 15" x 3.5".

Price: £11 including UK postage
