

NEW from Kingsway Models WD Wandsworth bus garage

Wandsworth began as an LCC tram depot. A programme to convert to trolleybuses was interrupted by WW2, and both forms of electric traction were operated until 1950 when diesel buses took over.

It closed in 1987, only to reopen a few years later and has been responsible for the sightseeing tour fleet.

Building size approx 22" x 7".

Price including UK postage £14.
